Epping Plaza Shopping Centre

Project Overview

Epping Plaza Shopping Centre first opened in 1996 and is located 21km north of Melbourne's CBD. Brown Consulting has provided structure design services for the Centre's extensions in 2007, 2009 and 2011.

The intention of the 2011 extension is to create an entertainment precinct. Features include an upgrade and extension to the existing cinemas as well as a new two-level 12,000sqm building that will house a gym, restaurants, ten pin bowling alley, office and a function centre. Externally, approximately 2,000sqm of landscaped external plazas will be created as public space between the existing Centre and new building. In addition, the project encompasses an eleven bay bus interchange area, an additional 400 car parking spaces and associated upgrades to access roads and intersections.
